SKILLS

Angular 2+

HTML

CSS

JavaScript

Git

EDUCATION

Bachelor of Technology (B. Tech)
2009-2013

Specialization: *Computer Science*

Lingayas University,
Faridabad (Haryana), India

CERTIFICATIONS / TESTS

The Complete Web Development
Bootcamp, Udemy.

LANGUAGES

Hindi – Native
English – Fluent

Mohit Kumar Sharma

Software Engineer

Dynamic and results-driven Software Engineer with 4 years of hands-on experience in Frontend Development, specializing in Angular. Proficient in designing, developing, and implementing complex web applications, with a keen eye for user experience and interface design. Actively seeking opportunities in Angular development.

WORK EXPERIENCE

Jan. 2022

– Present

GlobalLogic, Noida, India

Software Engineer

- Designing, developing, and deploying new features as per stakeholder requirements, including but not limited to user authentication enhancements and role-based access control functionalities.
- Conducting thorough testing and debugging of implemented features to ensure functionality, reliability, and compatibility across different browsers and devices.
- Contributing to the development of a hybrid web application using AngularJS and Angular 8, ensuring seamless integration of legacy and modern front-end technologies.
- Identifying and resolving issues related to broken internal links within the application, improving user navigation and overall usability.
- Collaborating with stakeholders to gather requirements and specifications for new features, ensuring alignment with business objectives and user needs.
- Demonstrated adaptability and flexibility by quickly learning and applying emerging frontend technologies and frameworks, staying ahead of industry trends and maintaining a competitive edge in the field of Angular development.
- Contributed to open-source Angular projects by actively participating in forums, submitting bug fixes, and proposing new features, establishing a strong professional presence within the Angular development community.

June. 2020 -

Oct 2021

Ditstek Innovations Pvt Ltd, Chandigarh, India

Software Associate

- Developed and maintained components for an IoT-based project using Angular 10, ensuring high performance and seamless user experience.
- Successfully set up a Niagara Vykon V4 station (IoT) in the client's workstation remotely, demonstrating technical expertise in IoT device configuration and deployment.

EXTRA CURRICULAR

- Painting
- Console Gaming
- Physical Workout
- Cricket

- Provided bilingual language support for the project, enabling users to view the webpage in both English and Japanese languages, catering to diverse user preferences and enhancing accessibility.
- Implemented the Angular Nebular UI library to enhance the project's UI/UX, leveraging its robust set of pre-built components and design patterns.
- Implemented data transmission and reception functionalities using Microsoft Azure services, enabling real-time data exchange between the IoT device and the front-end application for demonstration purposes.
- Conducted thorough testing and debugging of the Angular application and IoT device integration, ensuring reliability, security, and optimal performance under various scenarios.
- Documented technical specifications, installation procedures, and user guides for the project, facilitating knowledge transfer and ensuring smooth project maintenance and support.

COMPUTER SKILLS / BUSINESS SYSTEMS

- MS Office
- JetBrains WebStorm
- Microsoft Visual Studio Code

Expected CTC: Negotiable and as per the market standards in the place of posting.

Availability: 3 months
